

IN THE CLAIMS:

Please amend claim 5, (see attachment for details of changes) as follows:

5. (Amended) A light source having a primary radiation source, which emits radiation in the shortwave region of the optical spectral region in the wavelength region of 370 or 430 nm, this radiation being converted wholly or partially into secondary radiation of longer wavelength in the visible spectral region by means of a first fluorescent material as claimed in claim 1.

Respectfully submitted,

Thomas Langer
